J&L Fiber Services Product Case Study

Dammed Pattern

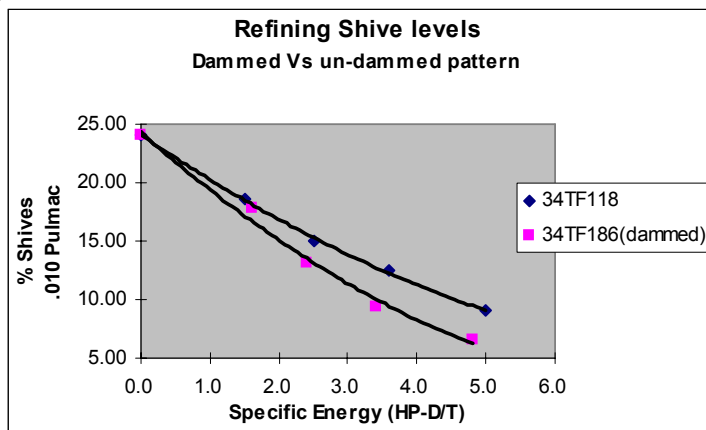

MILL INFORMATION

Refiner: Black Clawson 34"
Existing Plate Pattern: 34TF118, no dams
Installed: 34TF186, with dams

OBJECTIVE

Reduce shive levels from the pulp mill.

TRIAL RESULTS

CONCLUSION

Dammed pattern designs are greatly utilized in pulp mill refining and make an excellent de-fibering and shive reduction tool for preparing unbleached pulps for paper machine refining.
